## To : Academic Standards and Admissions Committee <br> From: Frank Peters, College of Engineering Academic Standards Committee <br> Date: February 19, 2006 <br> Re: Change to admission requirements and recommended high school courses

The College of Engineering Academic Standards Committee has proposed one change to the College of Engineering's admission requirements, and proposes to publish a list of 'recommended high school courses.' Currently, Engineering does not have any requirements or recommendations in addition to the general University requirements. This change was voted upon and approved at the February 7, 2006 College of Engineering Faculty meeting.

## Proposed Changes:

- Require 2 years of a single foreign language
- Recommend 4 years of high school mathematics
- Recommend 4 years of high school science (including one year each of chemistry, biology and physics)
- Recommend 3 years of high school social science

The foreign language requirement is proposed due to the increasing importance of the global workplace for today's engineers. The addition of the recommended high school courses will assist high school students in preparing for college, and to emphasize the importance of a strong mathematics and science background needed to be successful in engineering. These changes would put our college more in line with our peer universities’ admission requirements, as shown in Table 1.

| Wisconsin | $3(4)$ | $2(4)$ | $3(4)$ | $3(4)$ |  |

Values in () are the Engineering College Recommendations

A review of freshmen who entered the College of Engineering during the last four years shows that over $90 \%$ of them meet the proposed foreign language requirement. See Table 2. Those students who enter ISU without the required high school foreign language courses, will be able to satisfy the requirement by using their electives to take 2 semesters of a single foreign language.

Table 2: The number of semesters of high school instruction students entering the College of Engineering have attained. (The data comes from the EDT5 downloads, which is collected by the admissions office when students apply for admission.
It is not completely accurate as the data is self-reported.)
