

Meeting of the Faculty Senate Curriculum Committee  
4/4/24 via WebEx

Present: Carlton Basmajian (DES), Terri Boylston (CHS), Tom Brumm (CALs and chair), Heidi Christensen (Registrar), Kelsey Gillen (SVPP), Cassie Keefer (Admissions), Charles Kerton (LAS), Mackenzie Novotny (GPSS), Peter Ralston (BUS), Chris Rehmann (ENG), Shawna Saad (Registrar)

Guests: Soma Chaudhuri (COMS), Karri Haen (GDCB), Elizabeth McNeill (FSHN), Yanhai Yin (GDCB),

1. Call to order (2:01 p.m.)
2. No additions to the agenda.
3. Approval of minutes from 3/21/24: Minutes approved 6-0-0
4. Old business: none
5. New business
  - a. Discontinuation of Ph.D. Rural, Agricultural, Technological, and Environmental History.  
Noted during the discussion that this discontinuation was due to budget cuts to the Department of History. Approved 6-0-0.
  - b. B.S. in Integrated Health Science.  
Karri Haen, Elizabeth McNeill and Yanhai Yin from proposal committee were present the proposal and answer questions.

Question/comment	Response/discussion
Did you reach out to the College of Business	Yes, there were discussions with Assoc Dean Gray. IHS students can take courses in the Health Care Management Certificate.
More information about pre-med vs. non-pre-med students?	One of the pathways is for pre-med students. But market analysis from the Hanover group showed many other possibilities (e.g. clinical trial manager) for careers in this field. This guided the types of pathways created.
Where will the students come from?	Anticipate new students to ISU. There is strong interest in public health programs and ISU does not have any named programs in this area. Enrollment projections are based on what other schools with similar programs have seen.
Curriculum is not entirely presented.	While a degree proposal is not a curriculum approval process (that's a catalog thing), it would be helpful if a more complete description (all 120 credits) were given.

Proposal was approved 6-0-0.

- c. Undergraduate minor in Artificial Intelligence.  
Soma Chaudhuri presented the proposal and answered questions. This proposal is different from the previous minor in Applied Artificial Intelligence – this is a very technically oriented

minor for students with advance computer science experience, not a more general minor available to all students. The only concern expressed was for the department to explain this clearly to potential students.

Approved 6-0-0.

6. Other.

Kelsey Gillen brought two items in need of FSCC guidance in the near future: (1) uniformity in course numbering; and (2) operational things with regard to things like stand-alone credit. She will coordinate with Boylston and Brumm who will bring things to the committee as needed.

Adjourned: 2:52 p.m.
